For immediate release:

DOWNTOWN WARREN HAS WIFI

Trumbull 100 and the City of Warren are proud to announce the completion of the wifi internet installation in downtown Warren. The wifi will cover the outside areas of Courthouse Park, the Kinsman House lawn and the Warren Community Amphitheater. This was a joint project between the City of Warren and Trumbull 100.

The wifi will be free to all with wireless internet access. Shelley Taylor, President of Trumbull 100, says "This is a quality of life project. Warren is keeping ahead of the technology curve and this can prove helpful in recruitment and retention of our businesses and citizens."

Embarq was the contracted entity that installed the wifi system. They are also donating the first two years of internet service.
