Figure 1 consists of 12 line drawings illustrating the development of a chick embryo. The drawings are arranged in a grid-like fashion, with some showing the embryo in different stages of growth and others showing the embryo in different positions. The drawings are labeled with numbers 1 through 12. The sequence shows the progression from a single cell to a fully formed embryo with visible features like the head, beak, and legs.

This image shows a single sheet of white paper with horizontal blue or grey ruling lines. The paper appears to be from a notebook or a set of stationery. There are some very faint, blurry marks scattered across the surface, which could be ink bleed-through from the reverse side or simply dust and imperfections on the paper itself. No legible text or distinct drawings are visible.
