Now is the time, Warren, to improve our opportunities for safe travel. Everyone travels, whether it is for work, school or play; by walking, biking or taking public transportation. We must work together to increase safe and accessible options for you. We need, and value, your help and input!

What would get your family and neighbors walking or biking in our city more?

- Prioritize pedestrian and bicycle projects in our community
- Provide input on your city's preliminary project list
- Provide your input online: https://wikimapping.com/Warren-ATP.html
